

Problem Brief 1 : Zostel wants the world to explore the tiny offbeat villages as well as popular megacities of India by unlocking travel amongst youth. Moreover, promoting destinations is a direct way of promoting accommodation as well as experiences Zostel provides in those regions.

We have tried making a filter that excites people to explore new places and plan their trips at the earliest. We have taken into account all the different locations that Zostel has its beautiful hostels and incorporated them into our filter, giving the user a chance to see what all Zostel offers.

The filter prompts user as to where would there next Zostel destination be.
